DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11-21, 24, 26, 27 & 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Wood (WO 98/02294).

Wood discloses a method for applying radiation through one of the members to be joined by welding. The heating relies on inclusions through the thickness of the layers which are responsive to radiation which in turn raises the temperature through the layers and promotes bonding. Radiation for heating are in the mid-infrared to near visible region. Some of the materials which are joined are extruded plastics and have PU coatings. One example of an inclusion material is carbon black and others. The welding layers have a high emissivity for the mid infrared wavelength.

Allowable Subject Matter

3. Claims 10, 22-23, 25 & 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
